Microsoft Test Manager (MTM) is the " rich client " for QA and Manual Testing that hooks in to TFS. It ' 's been around for a long time and while it ' 's a great tool, it ' 's infamous for having a difficult and confusing user interface mostly because it had two missions that were only loosely related.

**Microsoft Test Manager is pretty much done. What ' 's missing -**

That answer is a resoundingly yes, in my opinion, and I believe you would find some real value in having your UAT testers using Microsoft Test Manager to perform those UAT tests. However, I think the real question that should be asked is do you have to purchase a license for Microsoft Visual Studio 2010 Test Professional to use Microsoft Test Manager to perform those User Acceptance Tests (UAT)?

**Can I Use Microsoft Test Manager for User Acceptance Tests -**

Note that you can use the above to control Test Case Work item field customizations. However, since the other test artifacts (Test Suites, Test Runs, Test Results etc) are not work items, it is not possible to use the above approach. I don't see any way to report on what steps were passed or failed during manual testing using the warehouse or ...

MTM hangs when a build is specified against the test plan and the 'Verify Bugs' option is invoked. Steps to reproduce: 1. Create a XAML or vNext build. 2. Assign the build to a test plan. 3. Execute a manual test case in Microsoft Test Runner. During execution create a bug. 5. End the Microsoft Test Runner session and go to 'Verify Bug' tab. 6.

**Download MTM 2016 Update (KB3092997) from - microsoft.com**

If you haven't already, create your manual tests. Select a test from a test suite and run it. Microsoft Test Runner opens and runs in a new browser. Start the app that you want to test. Your app doesn't have to run on the same computer as Test Runner. You just use Test Runner to record which test steps pass or fail while you manually run a test.

**Run manual tests - Azure Test Plans | Microsoft Docs**

Fixes a crash issue that occurs when you run a manual test case in Visual Studio 2010. This issue occurs when some diagnostic data adapters are selected in the Data and Diagnostics section of the test case.
